

# Multi Award Winning Clean Air Technology

**Designed to comply with  
the 2010 USA & Euro EPA mandatory  
legislative requirements**

The Green Diesel Fuel Injection System dramatically reduces particulate emissions whilst delivering benefits of **MORE TORQUE, MORE POWER** and **LESS FUEL CONSUMPTION.**

Suitable for **DIESEL** and **PETROL ENGINES.**

A man with grey hair, wearing a white shirt and a dark vest with a Canadian flag patch, is holding a green and silver fuel injection system component. He is standing in front of a large, detailed diesel engine. The engine has a white cover with the "Green Diesel" logo on it.

**See us at the  
Stuttgart Engine Expo**
